RFS area: A Rollout Region is ready for service when the majority of premises are passed by the nbn™ access network and RSPs are able to begin selling services over the nbn™ access network in that Rollout Region.

Ready to connect: A premises is ready to connect when an nbn™ service order can be placed, and the service can be connected within an area that has been declared ready for service.

Not yet ready to connect: When a premises within an area declared RFS cannot currently order a service until further work is completed. For example, this could be because there is additional cabling required for an apartment block. This includes SC0 (FTTP), SC10 (FTTN/B), SC20 (HFC) and SC30 (FTTC).

Premises activated: Refers to premises which have an active service installed.

Variations in number from week to week reflect the modular construction program. The construction program is completed in blocks, so variations may occur. Following completion of the construction process passing premises in the streets, further validation of address data is undertaken of the 'as built' network against estimates obtained from national address data. There may be some fluctuation in numbers from week to week as a result.
